## B (The Oxford Series in Electrical and Computer Engineering)

By Sima Dimitrijev

Oxford University Press, USA. Paperback. Condition: New. 258 pages. Dimensions: 11.0in. x 8.5in. x 0.6in. For the second edition, the author builds upon and expands on hallmark features of the book established in the first edition, adding sections on new technology and increasing the number of end-of-chapter problems by 30. Updated material relating to the environmental applications of technology was added, as well as a new chapter on nanoscale devices. Chapters on MOS capacitor and generation and recombination were also revised and updated. The book is divided into 4 parts: Part I on Semiconductor Physics; Part II on the principles of operation and modeling of the fundamental junctions and transistors; Part III on the diode, MOSFET and BJT topics needed for circuit design, and Part IV on photonic devices, microwave FETs, negative-resistance diodes, and power devices. Within each part, material is presented hierarchically, with core topics first, followed by advanced topics. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

### Reviews

*An extremely wonderful pdf with perfect and lucid information. Better then never, though i am quite late in start reading this one. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Elenor Koch PhD**

*This publication will be worth purchasing. It is written in straightforward words and not hard to understand. I am just very happy to explain how here is the best ebook we have read in my own lifestyle and might be the best publication for at any time.*
